

Boby Dubey

Security Engineer | Security Operations, SOC Automation, AI/LLM Security

Bengaluru, Karnataka, India | +91 7367048012 | dubeyboby0593@gmail.com | linkedin.com/in/boby-dubey

Cybersecurity Associate in FICO's SOC handling 150-200 alerts a week across email, EDR, cloud, network, and identity, and building AI-driven investigation tools and automation on AWS Bedrock adopted by the wider SOC team.

SKILLS

Security Operations: SIEM, SOAR, EDR, Alert Triage, Incident Response, Phishing Analysis, Privileged Access Monitoring, Threat Hunting, Log Analysis & Correlation, Root Cause Analysis, Vulnerability Research, Attack Surface Management, Detection Engineering

Security Tools: Splunk Cloud, CrowdStrike Falcon, Microsoft Defender for Endpoint, Palo Alto Cortex XDR, Palo Alto Panorama, Wiz, Qualys, Rapid7, Abnormal Security, Imperva WAF, Netography, Delinea, Clutch Security, Zscaler (ZPA, ZIdentity), Okta, AWS IAM Identity Center, Torq, ServiceNow

Cloud & AI Security: AWS (Bedrock, Guardrails, ECS Fargate, EC2, S3, DynamoDB, KMS, CloudWatch), Microsoft Azure, LLM Red Teaming, Prompt-Injection Defense, Agentic/MCP Security, Zero-Trust Architecture

Engineering: Python, TypeScript, JavaScript, FastAPI, Node.js, React, PostgreSQL, Redis, SQLite, NATS, Docker, Playwright, Ollama, Linux, Git

EDUCATION

Chandigarh University, Chandigarh, India | Sep 2022 - Jun 2026

Bachelor of Engineering in Computer Science (Specialization in Information Security) | CGPA: 8.48/10

EXPERIENCE

FICO, Bengaluru, Karnataka, India

Cybersecurity Associate, Security Operations Center | Jul 2026 - Present

Cybersecurity Intern, Security Operations Center | Jun 2025 - Jul 2026

- Triage 150-200 alerts a week across email, EDR, cloud, WAF, network, and identity tools, escalating confirmed threats.
- Built Splunk detections and SOAR playbooks for account impersonation so attempts are caught and handled consistently.
- Monitor privileged users in a core team working with the Director, using Splunk detections to flag unauthorized actions.
- Led the root-cause investigation of a NOC-escalated data usage spike, working alongside the Incident Response team.
- Responded to a confirmed account compromise, taking immediate containment actions to limit impact.
- Identified access and endpoint control gaps during investigations and delivered remediation findings to IT and engineering.
- Automated repetitive SOC tasks with Playwright scripts, freeing analyst time for investigation work.
- Built AI workflows and investigation tools widely used by the SOC, reducing investigation time and raising quality.
- Set up MCP integrations (Atlassian, ServiceNow, Wiz) so analysts can pull tickets, docs, and cloud findings into AI tools.

PROJECTS

AI-Driven SOAR Platform | Backend Architecture, Deployment & AWS

- **About:** Evidence-first SOAR where a multi-agent LLM panel forms verdicts and only trusted actions run automatically.
- **Impact:** Keeps irreversible response actions human-approved and records every decision in a tamper-evident audit trail.
- **Tech:** Python, FastAPI, React/TypeScript, AWS Bedrock, PostgreSQL, NATS, AWS ECS Fargate

SOC Smart Analyzer (SSA) | Hackathon Team Lead

- **About:** Unified platform for 6+ AI-assisted SOC tools, a policy knowledge graph, and rate-limited Cortex XDR ingestion.
- **Impact:** Gives analysts one 2FA/RBAC-protected workspace for AI-assisted triage and policy-grounded alert analysis.
- **Tech:** Python, FastAPI, AWS Bedrock, Redis, SQLite, networkx

Attack Surface Monitoring and AI Investigation Platform | Contributor, Mentored Team

- **About:** Attack surface monitor with a SOAR queue, a read-only AI investigator, and a Sigma hunt workbench.
- **Impact:** Maps threat and vulnerability feeds to discovered assets and drafts containment plans for analysts.
- **Tech:** Node.js/Express, React, AWS Bedrock, AWS ECS Fargate, DynamoDB, S3, KMS

LLM Security Red-Team Scanner | Built MVP; Core Contributor

- **About:** Red-team scanner running attack campaigns on LLM, agentic, and MCP systems with deterministic verdicts.
- **Impact:** Gives the team repeatable, auditable security testing of LLM and AI agent systems.
- **Tech:** Python, FastAPI, React/TypeScript, PostgreSQL, Ollama, MCP, AWS Bedrock, Docker

ACHIEVEMENTS

- **2nd Place, FICO Trust Hackathon (Jun 2026):** led the 5-member SOC Smart Analyzer team; recognized by CISO.
- **Claude Code Bootcamp:** delivered a bootcamp series to FICO's cybersecurity teams on building AI-based security tools.

CERTIFICATIONS

- Microsoft Certified: Cloud and AI Security Engineer Associate (SC-500), Sep 2026
- Microsoft Certified: Security Operations Analyst Associate (SC-200), Jun 2026
- Certified LLM Security Professional (CLLMSP), Red Team Leaders, Jun 2026
- SOC Analyst, Torq, Nov 2025 | ISC2 Certified in Cybersecurity (CC), Oct 2024
- Google Cybersecurity Professional, Oct 2023
